

How efficient would your business be without your telephone or computer system?

Can you afford to lose critical data?

Your customers are important and you cannot afford to miss calls or lose important information.

A sudden loss of power will disrupt most business operations and could lead to a total inability to trade.

It is not only total mains failures or blackouts that have devastating effects.

The numbers and types of load falling into the critical' category are rapidly increasing.

Telephone and IT network equipment are particularly susceptible to:

- Surges
- Supply frequency changes
- Brown outs
- Power sags
- Power spikes
- Noise frequency interference

Can you afford to let this happen?

Dalys recommend the Uninterruptible Power Supply units from Borri Ltd, world leaders in power protection field.

Dalys will advise you on the available options for your particular circumstances.

We supply and install the UPS to protect your equipment against damage, safeguarding your business.
